KPA 401 Wood Flooring Adhesive

KPA 401 Wood Flooring Adhesive is a high solids, water resistant, patented Tri-Polymer adhesive, formulated for the installation of engineered plank, parquet, acrylic impregnated wood flooring, bamboo, solid shorts and pre-finished solid plank wood flooring. KPA 401 is an excellent adhesive for installing flat milled, solid plank up to one half-inch thickness. The patented Tri-Polymer chemistry minimizes cupping or lifting of plank flooring. The excellent re-bond characteristic helps to minimize call backs from “popping” or “hollow spots.” KPA 401 ensures a strong, water resistant bond.

Size	Trowel Sizes/Spread Rate
4 Gallon	Engineered Plank:
1 Gallon	3/16" x 1/4" x 5/16" V, 50-60 sq. ft./gallon
	Solid shorts, Bamboo:
	3/16" x 3/16" x 3/16" U, 35-40 sq. ft./gallon

KPA 402 Tongue & Groove Adhesive

KPA 402 is formulated for all types of “laminated” and floating floors. It has a fast drying formula that forms a strong, rigid bond. KPA 402 cured adhesive is water and solvent resistant. It meets all Low VOC Emission standards and can be used over radiant heat systems.

Size	Trowel Sizes/Spread Rate
1 Pint	100 - 150 sq. ft./16 oz bottle
